

Welcome to the fictional Japanese town of Kiyomi

清美

Situated on the outskirts of Kyoto, it is a combination of Residential and Industrial areas adjacent to a large Commercial Centre.

The Shinkansen "Bullet Train" passes close by on its dedicated track between Kyoto and Tokyo.

There is a regular Shuttle Commuter Service between the outskirts of the town and the Commercial Centre.

The JR main line passes through the town, operating both freight and passenger services.

Using Kato & Tomix track, this layout is based on a variety of Japanese table layouts I have seen in Japan and on the Internet.
